

INVATION™ STAY CLEAN VACUUM DRUM

NO BREAK-IN VACUUM DRUM PAD FINISH

INVATION™ STAY CLEAN VACUUM DRUM INSERT

DURA-MOTION™ FINISH

Invation™ Stay Clean Vacuum Drums are the latest innovation in vacuum drum technology from B & H Labeling Systems. These high performance vacuum drums stay clean during operation which means fewer stoppages, increased up-time and higher productivity versus traditional vacuum drums. Invation Stay Clean Vacuum Drums are an available option on all new B & H labelers, and they are also available as aftermarket upgrades for installed Marathon, BH8000, BH8000S, BH8000U, and BH1600 labelers.

FIELD TESTED PERFORMANCE

Invation™ Stay Clean Vacuum Drums have been in use in demanding, high volume customer production environments since early 2008. The feedback from our trial customers has been unanimous and positive. Trial customers have reported routine uninterrupted runs using Stay Clean Vacuum Drums from three hours to full twelve hour shifts, and no trial customer was willing to return their Stay Clean drum at the conclusion of their in-house testing.

STAY CLEAN = FEWER STOPPAGES

Glue residue build-up is unavoidable on current vacuum drums. When glue build-up disrupts the labeling process, everything stops while the drum is cleaned.

Invation Stay Clean Vacuum Drums operate on a simple principal – If the drum stays clean, you don't have to clean it. Invation Stay Clean Vacuum Drums feature Dura-Motion™ aluminum inserts in specific positions on each vacuum drum. These inserts minimize the build-up of adhesive particles on the vacuum drum, which translates into fewer stuck labels, fewer stoppages, and longer production runs.

Invation Stay Clean Vacuum Drums also feature our new No Break-In pad finish which eliminates the break-in process for new or re-padded vacuum drums.

TOTAL FINANCIAL IMPACT

Total financial impact is all about maximizing production output and minimizing operating expense.

It is also about investing in solutions that offer a fast payback and a real return on your investment.

Invation Stay Clean Vacuum Drums deliver dramatically increased uptime and improved productivity that offers a payback on your investment that is measured in months, not years. And we can quantify this financial impact for your operation using B & H's proprietary Total Financial Impact model and process.

AFTERMARKET UPGRADE

New Invation Stay Clean Vacuum Drums are available for all installed Marathon, BH8000, BH8000S, BH8000U, and BH1600 labelers.

VACUUM DRUM CORE EXCHANGE

Existing drums for Marathon, BH8000, BH8000S, BH8000U, and BH1600 labelers may be returned to B & H and reworked as part of our Core Exchange Program. Returned drums will be reworked into the Stay Clean design. This program allows B & H to reuse your existing vacuum drum components which saves you money and helps the environment by reusing a valuable natural resource.

CONTACT US

For more information on Invation Stay Clean Vacuum Drums, contact your B & H Regional Sales Manager or simply call B & H at 209-537-5785. To order Invation Stay Clean Vacuum Drums for installed B & H labelers, contact your dedicated B & H Inside Sales Coordinator at 209-537-5785 or e-mail your inquiry to parts@bhlabeling.com.

INVATION™ STAY CLEAN VACUUM DRUM HIGHLIGHTS

- Latest high performance vacuum drum technology from B & H
- Dura-Motion™ inserts minimize build-up of adhesive particles on vacuum drum
- Fewer stoppages to clean the drum translate into increased uptime and improved productivity
- Vacuum drum pad features new “no break-in” finish
- Fast payback based on increased productivity
- Available for two, three, and four station vacuum drums
- Available option on new Marathon, BH8000S, BH8000U, and BH1600 labelers
- Aftermarket upgrade for installed Marathon, BH8000, BH8000S, BH8000U, and BH1600 labelers
- Core exchange program available for existing Marathon, BH8000, BH8000S, BH8000U, and BH1600 vacuum drums

“INNOVATION FOR THE LONG RUN®”
